ULTIMATE K L

info@ultimate-kl.com
www.ultimate-kl.com

Hey, Waiter!

Get your waiter to take orders from a tablet and send them directly to the kitchen. This Waiter App is POS synched too!

Works Over Wi-Fi

It gives you ability to act instantly so you can keep track of your order uninterrupted. It also prepares custom reports right on time.

Try It For Free

Have a go at it for free before purchasing. We'll even return your money if it doesn't suit you!

Innovative Solutions
Would you like to manage your reservations in advance? With the help of Fuudy, your kitchen is automatically notified by future reservations on time. We cover all your needs

Card Tracking
Other than VISA and Master Card; you can also keep track of the loyalty cards. If you have your own, it will let you define discount rate and more

Orders Through Phone
When you receive orders through phone, you can respond by asking them to repeat their order.This is because Fuudy allows you to integrate with your Caller-ID device

Barcode Scanning
This will make your inventory management more systematic. An added bonus to your team!

Tracking of the Cash Flow
You will know the exact amount that has to be in the cash register at the end of the day. Also, you can keep track of the report for your most ordered or favourite items on your menu

Personalised Settings
You can define the natural process of your restaurant by utilizing the new settings for which allows you to see every detail in one screen
